

# Can do more than others: S 6000 *Cambio*

C+P Cambio is more than just a locker!  
The following facts are what makes this range so incomparable:

- **Innovative ventilation**  
and drying by means of the SVL, FVL, or FVLD concepts
- **Modular retrofitting**  
thanks to system body that can be reconfigured later
- **Optimum use of space and interior design**  
thanks to corner, niche, and front end solutions
- **Underbench solutions designed to meet your needs**  
for adaptation to any room situation
- **Choice of many materials and colors**  
for every taste and every requirement
- **Body and steel doors electrolytically zinc-plated as a standard**
- **Vast interior space** thanks to a body height of 1850 mm plus sub-frame (feet or base)

**NEW**

## Lockers

The C+P Cambio locker offers plenty of space for customized solutions, some of which will be shown on the following pages. The range of possibilities is endless: Locker fronts with irradiated/milled motifs, business class designs, electronic locking systems, and much more.

Let us know your ideas and send us your project-specific inquiry! In the world of changing rooms and locker systems, Cambio is the professional solution for nearly all furnishing needs.

# The optimum: S 6000 *Cambio*

**NEW**

The Cambio ventilation concepts are explained in detail on pages 440-441

## Decor fronts (HPL)

For our Cambio S 6000 series lockers and assembled box lockers with decor fronts, you can choose from the following decors (other decors on request):

## Ingenious and pleasant for the highest standards.

Feet 130 mm high with protective sleeves, can be adjusted in height from inside and outside

**Single- or double-walled doors with insulation:**  
Single-walled steel doors with closed side profiles for the highest level of stability.  
Double-walled doors in sandwich construction with convenient body sound absorption.

Door opening limiter 90° standard design. New design with special heavy-duty, plastic-coated stainless steel cable.

# Lockers

Lockers ..... 442

Double-tier lockers ..... 444

Assembled box lockers ..... 446

Z lockers and corner solutions ..... 450

**Stainless steel hinge:**  
For HPL decor doors

**For integration with Cambio:** all common mechanical and electronic locking systems, from turning bolt latches to coin-operated locks to electronic locking systems as part of complete building automation (see pages 458, 459, 510-513).

**Cylinder lock:**  
with 2 keys as standard fitting.

# S 6000 *Cambio* **NEW**

## Systemized ventilation and drying.

They all have holes and louvers. Somehow ventilation is supposed to be achieved through them. But is that enough?

In C+P Cambio, self-ventilation through the SVL concept® was tested and confirmed in scientific investigations.

Damp clothing dries much quicker in Cambio thanks to the effective flow behavior enforced by its design - guaranteed and without any additional energy input! In addition, the FVL and FVLD concepts are available for special drying tasks.

### SVL concept®

Self-Ventilation concept (SVL) = effective drying without additional ventilation equipment!

(standard)

Applications for the **SVL concept®**:

Can be used for 90% of all drying tasks! Depending on moisture content, clothing may dry in 6-14 hours. The room temperature should be approx. 20° C with a relative humidity of approx. 50% (normal climate in Central Europe).

### FVL concept

Forced Ventilation concept (FVL) means elimination of odors by means of high air flow rates and improved drying thanks to connection to an on-site ventilation system.

(additional equipment)

Applications for the **FVL concept**:

Can be used wherever odors need to be eliminated while performing normal drying tasks. Depending on moisture content, clothing may dry in 6-14 hours. The room temperature should be approx. 20° C with a relative humidity of approx. 50% (normal climate in Central Europe).

### FVLD concept

Forced Ventilation concept with Drying (FVLD) means effective air renewal with an electric dryer and additional ventilation equipment!

(additional equipment)

Applications for the **FVLD concept**:

Can be used wherever a very high amount of damp clothing must be dried in a short time. Depending on moisture content clothing may take only few hours to dry.

### Comparison of the concepts

Comparison of drying of conventional lockers and lockers with the SVL, FVL, and FVLD concept by C+P:

- SVL** = locker with SVL concept®
- FVL** = locker with FVL concept
- FVLD** = locker with FVLD concept

## The S 6000 Cambio series offers more:

- Durable sheet steel construction with overlapping doors
- **54° slope on the body interior - for high stability and an easy, convenient way to remove clothing**
- **New ventilation system with the SVL concept® as standard feature (see previous page)!**
- Fronts made of steel (single-walled, optionally double-walled or insulated) or HPL (optional) with wood decor for an even more attractive appearance
- Door hinges for sheet steel doors made of aluminum/plastic
- Door hinges for HPL decor fronts made of stainless steel
- Door opening limiter 90° for outstanding closing characteristics as standard fittings
- **Body and steel doors electrolytically zinc-plated as a standard**
- Cylinder lock with 2 keys
- **Optimal air circulation via predefined ventilation spaces in front of and behind the hat shelf**
- Sturdy wardrobe rail made of oval profile, 4 twist-proof hooks with system holder, e.g. for coat hangers or movable partitions
- Wide variety of interior fitting solutions for any requirement
- **Slot-in shoe shelf, can be easily retrofitted by users**

- Height adjustment through adjustable plastic feet 130 mm high, can be easily adjusted from inside and outside
- Base height-adjustable
- Wear-resistant plastic feet ensure protection from corrosion
- Sub-frame alternatively with feet, base, spacious storage box, or bench

- A** Locker rows or individual lockers ..... 442
- B** Corner lockers ..... 452

## Lockers S 6000 Cambio

with **SVL concept®** and drying guarantee as standard features, see page 440 and 441

## Mirror face plates

Cambio offers a range of different end face plates to enhance both the function and the appearance of the ends of locker rows, which often go unused.

The panels with integrated mirrors with or without deposit areas, with sockets or lighting, allow for customized options for this space.

They can either be attached to lockers or simply to the walls of a room.

**End face plate**  
to be attached to the side of the locker row, **for locker depths of 500 mm**  
For additional mirror panel options, please submit a project-specific inquiry.

Labeling systems ..... 484

### Functional crossbar

for connection to mounting parts on the compartment interior

Order no. **4500-701**  
Price € 9,-

Locking systems see next page

## Mechanical locking systems

At C+P you can choose from the entire range of mechanical locking systems available on the market. The basic set includes the cylinder lock and two keys. The turning bolt latch for padlocks as well as deposit locks, token-operated locks, or ticket-operated locks can be integrated as well.

Locking no. according to customer requirements	for cylinder lock (longer delivery time)
Additional charge per lock	
Order no.	....-..99
+ Addtl. charge €	8,-

**Safety turning bolts as standard design:**  
It is impossible to destroy the locking mechanism by overwinding because the locking cylinder only engages once the padlock has been removed.

**Cylinder lock:**  
The basic fitting for all Cambio S 6000 lockers. Every lock is supplied with 2 keys. Master key systems are available with or without a security certificate for more safety and convenience.

**SAFE-O-MAT deposit lock:**  
The best-selling classic among coin-operated locks. Available with a traditional master key system or with the innovative PROMAX exchangeable cylinder system.

**Coin-operated deposit lock:**  
The alternative for the basic function of the deposit lock.

**For electronic locking systems** and information about the functionalities of SAFE-O-MAT locks, please see pages 510-513

**SAFE-O-MAT number plate:**  
Instead of the sign, silver, please specify numbering (order no. 8501-430).

**Coin-operated lock:**  
As classic deposit or token-operated lock where the coin is kept as a fee for the use of the locker or compartment.

**Ticket-operated lock:**  
The practical solution often used in public swimming facilities: The admission ticket purchased at the machine serves as a deposit at the same time. Staff IDs and club membership cards can be used for this purpose as well. Please inquire with respect to your specific needs.
