

KOMFORT

ENHANCE
YOUR SPACE
WITH OUR DOUBLE
GLAZED DOOR:

SONIK

The 44mm double glazed door from Komfort

INTRODUCING SONIK

Sonik is our universal double glazed door that can be integrated with all Komfort partitioning systems. This ready to hang double glazed hinged or pivoted door provides enhanced acoustic performance.

- Integration with all Komfort partitioning systems
- Exceeding acoustic guidelines: up to 38dB(Rw)
- Better working environments
- Achieve great design: up to 3m in height
- Fast installation
- Multiple ironmongery options

ENGINEERING EXCELLENCE:

As part of our constant research and development we set ourselves the task of creating a better environment by increasing the acoustic performance of the door, an area where sound leakage is common. The result is an engineered high performance severe duty, hinge endurance grade 12, double glazed door that exceeds British Council For Offices guidelines and can be integrated across all of our partitioning systems.

Universal integration:

The Sonik is universal. It can be integrated with all of the Komfort partitioning systems with either a hinged (Sonik.H) or pivoted option (Sonik.P).

Better working environments:

The enhanced acoustic performance and design aesthetics of Sonik create better working environments and help improve productivity, privacy and overall feel good factor.

Better performance:

Guidance laid out by the British Council for Offices recommends doors should achieve a minimum acoustic performance of 35dB(Rw) to prevent loud speech being audible. Sonik goes above and beyond this guidance by being certified up to 38dB(Rw).

Great design:

A stylish double glazed door that can achieve up to 3m in height (Sonik.H) and 2.7m[†] (Sonik.P). Using a matching overpanel* enables designers to increase the overall height.

[†] Sonik.P 3m high option imminent. * Please consult with our technical/sales department for full options.

Choice of ironmongery:

The Sonik is complemented by a wide variety of ironmongery options, including intelligent wireless access control systems available with no need for an electrician to install.

In situ:

Sonik @ Freeman Street Market

New 'digital hub' houses a large meeting room and adaptable conference facilities to provide a professional space for meetings, seminars, interviews, workshops and community inclusive events.
