GAT Relaxx is a powerful software used for the management of the GAT NET.Lock system. Features of GAT Relaxx include a networked alarm, occupancy monitoring and remote locker control.

The software provides detailed information on locker usage and the ability to integrate with third-party management software, such as building access control or locker rental software, to create an innovative and complete system solution.

FEATURES

- ☑ **Multiple locker modes: Free, Personal, Dynamic, Rental and Reserved**

- ☑ **Networked alarm**

- ☑ **Occupancy monitoring**

- ☑ **Locker usage data**

- ☑ **Third-party integration**

- ☑ **Remote locker**

- ☑ **Web interface**
