## BON APETITO RESTAURANT

**Location:** Shopping Mall Galeria Jurajska Czestochowa, Shopping Mall Libero Katowice, Shopping Mall Promenada Warsaw, Shopping Mall Mokotow Warsaw

**Date:** 2018

**Project:** Full Restaurant design and refurbishment

**Areas of work:** Space planning; bespoke furniture, lighting and signage manufacture, fit-out.

**Customer:** Bon Apetito is a chain of restaurants where the dishes are prepared on the spot according to the recipes developed by qualified chefs. A rich, standardized menu allows our restaurants to serve delicious dishes and flexibly react to new trends while guaranteeing high quality throughout the network.

**Overview:** The project required us to interpret designs to suit our fit-out and the creation of the whole furnishing of the premises with furniture, both for customers and for the staff. Elements of equipment which are characteristic for the entire network are personalized lighting, bar counter as well as marquee and seats for consumers. Working with a distinct design for all items, we produced some exquisite pieces including pin roller lamps. The restaurant looks startling and the sharp design allowed us to use our advanced machine park and woodwork skills to be a key feature within the project. We have been made aware while implementing this project that even a repeatable project is different and the individual stages of implementation are very different from each other. Thanks to such a place we are developing and we are ready and confident to take on new challenges. Our commitment, creativity and dedication to the project has been appreciated and noticed, which is why it is especially nice for us to be chosen to implement the next new locations of this network.

## FOOD AND BALL RESTAURANT

**Location:** Shopping Mall Libero Katowice

**Date:** 2018

**Project:** Full Restaurant design and refurbishment

**Areas of work:** Bespoke furniture, custom fit-out

**Customer:** Food & Ball is a place to watch football matches and have meetings together with good food and drink. It is maintained in the atmosphere of the best European sports pubs that we can find in London or Barcelona.

**Overview:** We were tasked with manufacturing a food pub stand out concept that would attract customers and add value to the Libero Shopping Mall. Our company was responsible for the implementation of the entire fit-out of the club's interior. Part of the project was creation of a raise and a lodge with display and visual details as well as personalized booths for clients and a restaurant counter. The Food & Ball challenge was to produce furniture that allowed combining a restaurant, bar and lounge while providing areas for entertainment in music and sport. The individual design features such as glass displays, suspended wooden rosettes constituting an element of lighting and comfortable velvet seats in booths for customers create different but complementing atmospheres in one space. Creating this space gave us a unique opportunity to combine our technical and technological skills as well as design and planning skills. The Food & Ball which is ideal for entertainment, beverage and food experiences mixes a traditional bar and a modern restaurant and this excites consumers - we are very pleased that we are a part of this unique project on the Polish market.

MONASTICO  
RESTAURANT

Design: Brandy's Design Photos: Tomasz Zakrzewski

MONASTICO RESTAURANT

**Location:** Targ Sienny Gdansk, Poland

**Date:** 2019

**Project:** Full restaurant design and refurbishment

**Areas of work:** Space planning; bespoke furniture, lighting and signage manufacture, fit-out

**Customer:** A new place on the culinary map of Gdansk, which offers Polish cuisine in a modern version.

**Overview:** The wonderful and very demanding project from the Brandy's Design studio was a challenge for us. Each element of the design is an individually designed work of art that perfectly harmonizes with the interiors of a historic tenement house located in the downtown district of historic Gdańsk. The facility has six floors, which will serve as a restaurant and hotel. The whole project will contain natural materials: black steel, wood and brick. Elements comprising all the equipment of the restaurant and hotel apartments are made in a consistent colour style (a black and white colour accent) with elements of aged wood. The cosy, warm and moody interior design as well as the high-quality workmanship of our finished interiors gives Monastico a carefully balanced and understated interior.

## AY-KA Bau GmbH

**Location:** Vienna, Austria

**Date:** 2019

**Project:** Custom fit out, design and implementation

**Areas of work:** Space planning; bespoke furniture, lighting and signage manufacture, fit-out

**Customer:** Construction company specializing in complex and comprehensive building solutions

**Overview:** For our client we have created all the furnishings for the newly established company headquarters - the project was created from scratch. Our design department prepared the furnishings of the entrance area: the reception, lounge with partitions and panels, lighting, armchairs and a waiting room for contractors. The subsequent rooms of the company are consistent with the overall look - we used natural wooden cladding, marble and the highest-quality upholstery fabrics, which created an elegant and comfortable decor. The project also included employee offices, the main office, a conference room with a coffee point and a TV stand. The colours are a mix of browns, natural wood, brown marble, gold and black. Our purpose was creating cosy offices with a homely and comfortable atmosphere where customers and employees feel a welcoming and homely environment in a comfortable and creative atmosphere.

## HÖLLWARTH SHOP

**Location:** Wien, Austria

**Date:** 2018

**Project:** Overall interiordesign and workmanship

**Areas of work:** bespoke furniture, customfit-out, lighting

**Customer:** Höllwarth is exceptional clothing for men and it stands for exclusivity, quality and luxury.

**Overview:** Our task was to comprehensively prepare the interior design and its implementation, taking into account the customer's guidelines: the store was to be spacious, bright and to be an exclusive place where the customer can calmly choose a men's clothing. The production included the construction of a shop counter, the arrangement of the shop, the creation of a comprehensive lighting system (designed specifically for the client), construction of a dressing room, exhibition shelves - in particular, a mechanical clothing presentation system - in the form of movable units. Thanks to the solutions applied, the shop gained surface area, allowing easy access to shelves with clothing and transparent assortment displays for the buyer. In this implementation, our company had the dual function of design and implementation - thanks to which the client had an influence on the appearance of his premises at every stage - and we could react quickly to any of his comments and fulfil all his arrangement. The result of the work of our departments is a project perfectly suited to the interior, effectively and creatively using the available space.

SPORT & FITNESS

WE CHANGE ORDINARY  
LOCKERS INTO STYLISH  
CHANGING ROOM

## RESHAPE

**Location:** Zabrze, Poland

**Date:** 2018

**Project:** Overall interiordesign and workmanship

**Areas of work:** Custom fit-out: locker rooms, benches, vanity corners, mirrors and VIP room

**Customer:** Re Shape is a very modern gym, SPA and health centre complex in Silesia.

**Overview:** In this project, our contribution consisted in proposing and creating a comprehensive layout of the ladies and men's changing rooms, vanity corners and VIP room. The club space was to be a modern and unusual solution, which will make the client feel at ease from the very beginning, and the proposed solutions will be ergonomic, yet simple and smart. All rooms constitute a coherent whole - contemporary and trendy. The full-size mirrors on the sides of the cabinets visually enlarge the space of the locker room, and the benches have a double function - as seats and storage space of the customers' footwear. The lockers are made of high-quality materials, and their black and white colours optically correct the dimensions of the room. The abundance of white gives the impression of more space and freshness. In turn, black gives a distinctive décor and emphasizes individual zones in the changing room.

## LOFT FITNESS CLUB

**Location:** Bielsko-Biała, Poland

**Date:** 2019

**Project:** Full rebranding and a new design for the club

**Areas of work:** work: space planning; bespoke furniture, lighting and signage manufacture

**Customer:** A popular fitness club in the city centre

**Overview:** This project was carried out by ATEPAA from the very beginning. We started with the full renovation of the facility including the complete replacement of glazing and the construction of a zone with free weights. The club received new, quite fresh branding, new lighting, the arrangement of functional zones, as well as a specially designed „hanging“ reception, a zone for customers on bicycles and a new locker room decor. The old reception area became a meeting and training area, the main entrance to the building has also gained a new face. Our task was to design all the spaces, renovate the rooms, manufacture and install all the equipment. LOFT gained a modern and designer face, which was immediately appreciated by the customers, and gave us the opportunity to prove ourselves in a very comprehensive task.

## HEALTHCARE

PERSONALIZED AND  
ERGONOMIC FURNITURE  
FOR MEDICAL FACILITIES  
THAT ALLOWS YOU TO  
CREATE A UNIQUE  
AND FUNCTIONAL SPACE

Design: Brandy's Design Photos: Tomasz Zakrzewski

  
DENTALMIGAS  
CLINIC

## DENTAL MIGAS CLINIC

**Location:** Cracow, Poland

**Date:** 2019

**Project:** Personalized design and execution of furniture

**Areas of work:** Bespoke furniture, custom fit-out

**Customer:** Dental Migas Clinic is one of the largest facilities of this type in Poland, has the most modern dental equipment and its own prosthetic laboratory

**Overview:** The project was made in cooperation with the Brandy's Design studio and consisted among others of comprehensive equipping of ten treatment rooms in working counters and personalized worktables which enhance interactions and relationships between medical staff and patient. On the ground floor we have created a waiting room zone - clean and casual - every detail on each component fits well with comfortable seating and side table systems. Our task was also to prepare the office area of the Clinic - the accounting room and the secretary's office intentionally designed to remedy basic storage problems received desks and systems for storing files. The prosthetics office received comprehensive equipment - in the form of a worktops and furniture for materials storing. Interior décor and its mood allow patients to feel special from the moment they cross the Clinic, all the elements are carefully thought out, without unnecessary or incidental additives.

THE PRINCES CZARTORYSKI NATIONAL MUSEUM

**Location:** Cracow, Poland

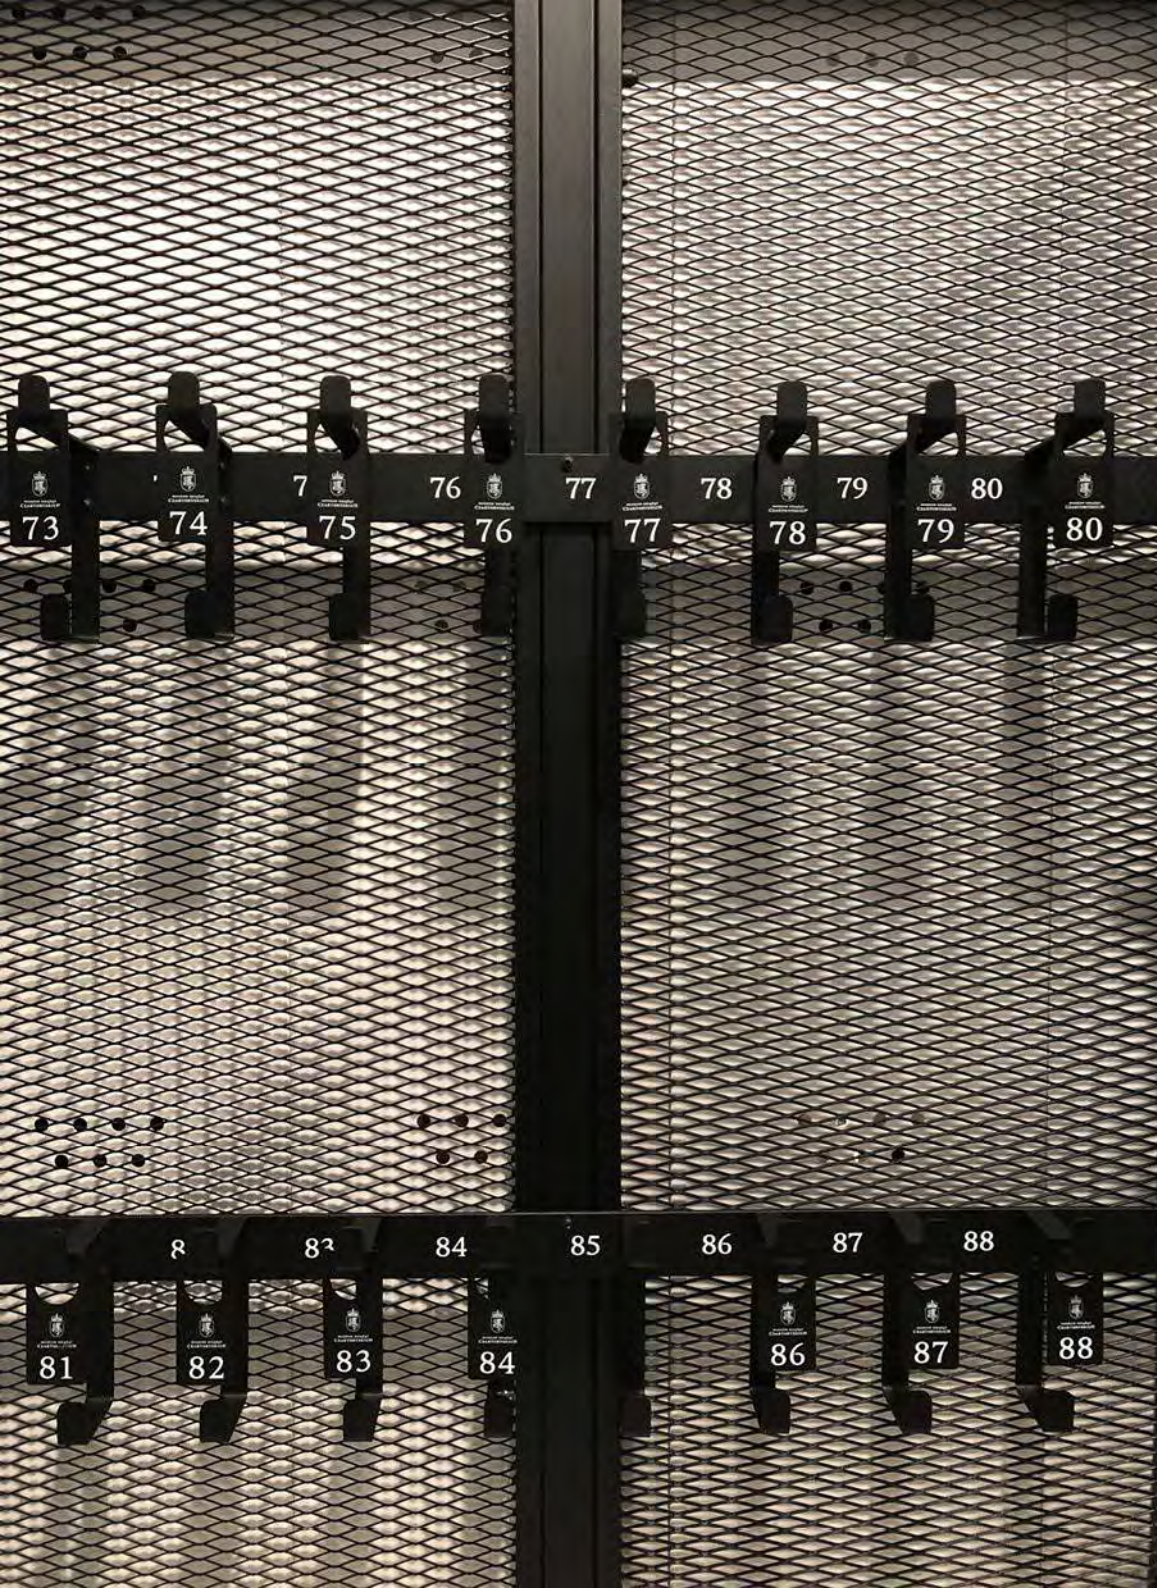

**Date:** 2020

**Project:** Visitor changing room fit out

**Areas of work:** bespoke lockers, walk-in changing room, mirrors

**Customer:** The renovated Palace of the Princes Czartoryski Museum with the most valuable collection in Poland, and one of the most valuable palaces in Europe. The Lady with an Ermine by Leonardo da Vinci or the Landscape with the Good Samaritan by Rembrandt van Rijn, as well as many other masterpieces of not only paintings, but also sculptures, crafts, military, applied arts, can be viewed in 26 exhibition halls, on two floors.

**Overview:** In this prestigious project, our task was to produce and adapt the lockers for the assembly of an electronic management system, as well as to equip each of them with individual graphics (reproduction of the collection located in the Museum). The other element of the task was the implementation of three self-service cloakrooms for groups visiting the palace and production/installation of side masking in the shape of mirrors in a copper frame. The rooms have been furnished in a consistent classic colour style - black, white and the addition of copper and marble, thanks to which the changing rooms have acquired a fresh and distinctive look.
