

Discover the best smart locking solutions for

Sports & Leisure

- Ultra-efficient use of locker capacity
- Easy managing and reporting system
- Fixed, flexible and anonymous use

The future of sports & leisure lockers is here.

Imagine: every guest always has a locker easily and quickly at their disposal in which they can safely store their belongings, without any employee interference, lost keys or coin issues.

They simply operate the locker via their phone (app, QR code, dedicated web page), company or club card or tag, or terminal, and can even reserve lockers in advance. Using some of the lockers for dispense functions, such as rental of sports goods, is also easily done. For administrators, locker management is now a piece of cake: simply via their phone or a PC, where lockers can be operated individually, multiple or all at once, or set up for automatic processing. System admins are happy too: no more need to install and maintain software and servers.

3 Developed as one system: Matching hard- and software.

- Ultra-flexible and expandable
- Unique lock that can serve as both push2open and pop2open
- Enhance locker cabinets with features such as USB 1.0/3.0 power connection, cabinet and/or door lights, RFID and more
- Cloud operated: safe, secure, automatically updated, no servers needed
- 3rd party software system integration (API)

USE CASE Snowworld NL (Multiple locations).

The feeling of the perfect snow underneath your skies or snowboard, followed by a real apres-ski, without being in the mountains.. This experience is possible at the indoor pistes at Snowworld, with six locations in Netherlands and Belgium. To make the experience complete, visitors can operate their day locker by using a self-chosen pin code on the Smarty screens. Paying for the locker is done directly via a cashless payment terminal below the screen.
