

Discover the best smart locking solutions for

Asset management

- 24/7 availability of company assets
- Reduce (personnel) costs while improving processes
- Dispense and take back, or sell, rent and more without employee interaction

The future of asset management lockers is here.

Using smart lockers for asset management has unprecedented possibilities. With limited staff intervention, products can be issued and returned, or even rented or sold, like company clothing, machine equipment or order picking tools. Employees no longer have to queue and can get to work or finish their shift rapidly.

As administrator you can easily monitor all locker activities on your PC, laptop, tablet or smartphone. 3rd party systems can be integrated, like in-locker sensors, in-locker charging and/or door access control. The 'open all' function makes it easy to physically check if all company assets are returned and in good shape or take out dirty laundry. In the office, the lockers can be used to issue spare laptops, key boards, charging cables or other stationery. With the Keynius Smart Locking Solutions, the possibilities are endless, all with the same, flexibly deployable system.

Why is Keynius the best solution for your asset management?

1 Use locker walls in the most efficient way.

- Users can control lockers via employee badge, pin code, fingerprint or App
- Administrators can monitor real time or check historical user data for optimal usage
- Use lockers indoor or outdoor for 24/7 product distribution and returns
- Save on subscription fees for unused lockers

2 Multiple usage modes: Choose the best way(s) to configure and operate your lockers.

Keynius Locker configurations

- IT & Asset Locker
- Team Locker
- Click & Collect Locker
- Personal Locker
- Visitor Locker
- Employee Day Locker

Keynius smart locking control

- Touch screen (Smarty)
- QR/Barcode
- Fingerprint
- Key card (RFID/NFC)
- App (Mobile/Tablet)
- Online (Mobile/Tablet)

3 Developed as one system: Matching hard- and software.

- Ultra-flexible and expandable
- Unique lock that can serve as both push2open and pop2open
- Enhance locker cabinets with features such as USB 1.0/3.0 power connection, cabinet and/or door lights, RFID and more
- Cloud operated: safe, secure, automatically updated, no servers needed
- 3rd party software system integration (API)

USE CASE The smart asset lockers from GXO.

GXO Logistics uses Keynius smart locking for issuing and returning their voice picking gear. Thanks to the power connection in the lockers and the smart settings of the software only fully charged devices are issued. When returning their device users can report any malfunctions immediately, so that the technical service can make repairs.
