

Discover the best smart locking solution for

Education.

- Use student card, App or pin code as locker key
- Easy to integrate with student management software
- Locker As A Service possibility

The future of school lockers is here.

Heavy backpacks, sports gear, personal items, coats, bags, even lunch... School lockers allow everyone to store their personal belongings conveniently and safely. This is obviously important for the users, but also ensures that the school environment is kept clean and tidy.

However, the 'old' way of using school lockers is often inconvenient, not economical and requires a lot of work and administrative effort from the staff (esp. administrators and janitors). With Keynius school lockers, this is a thing of the past. Benefit from secure, convenient lockers that are easy to set up and manage, and contribute to a positive business case. Students, teachers, staff, IT helpdesk, post office... Smart lockers can be used by everyone, everytime...

3 Developed as one system: Matching hard- and software.

- Ultra-flexible and expandable
- Unique lock that can serve as both push2open and pop2open
- Cloud operated: safe, secure, automatically updated, no servers needed
- 3rd party software system integration (API)
- Enhance locker cabinets with features such as USB 1.0/3.0 power connection, cabinet and/or door lights, RFID and more

USE CASE Maris College, The Hague (NL).

Maris college in The Hague has, next to beautiful schoollockers, also two locker walls with a special function. Students are able to borrow and return laptops issued by the school. Also handing in school-assignments can be done in the designated locker wall. More locker functions make the use of a smart locker wall even more flexible.
