

Discover the unique features of

Battery lock, LEO.

- Cloud controlled, bluetooth operated
- Ideal for flexible locker use, like rental
- Easy to install, perfect for retrofitting

The network controlled lock without the need for a network!

With the new range of battery-operated locks, Keynus offers intuitive locking solutions for new or retrofit projects. Using either keypad or RFID functionality the battery locks support companies with easy of use, secure locking solutions. Stylish design, easy to (retro)fit and competitively priced the locks offer added value to your organisation! LEO comes with many features as standard. Additional features like group locker use, app control, lockerwall management and power saving options are on a subscription basis.

smart locking reinvented

Why is Battery lock LEO the best non-wired locking solution?

Flexibility is key.

The unique Keynus battery locks do not require a Wi-Fi network but can be BLE (Bluetooth Low Energy) operated by using a smartphone or tablet connected to the Keynus cloud. All locks can be set, assigned and operated, providing easy control by manager and users, making it perfect for flexible use occasions such as in gyms, hotels, bars, events and festivals.

As administrator locks can be individually assigned, but also per lockerwall or complete group (subscription only). The Keynus Admin app gives full control and reporting options, with minimal effort. Reduction in facilities management cost, greater efficiency and control of storage units lies ahead with the Keynus battery lock LEO!

● Keynus Battery lock LEO PIN

■ Features Battery lock LEO

- Slim design
- Robust, brushed steel construction
- Capacitive touch
- Easy to mount (ideal for retrofit)
- BLE (Bluetooth Low Energy) connection
- Cloud controlled (MS Azure)
- Manage and use with Keynus app
- Battery life time up to 5 years
- Integratable in wired Keynus locking system

USE CASE Tergooi MC Hilversum.

Tergooi Medical Center (NL) was the first Keynus customer with 1000 new smart battery locks LEO RFID installed, besides 1100 locks with the Keynus wired solution. Using the battery lockers for flexible use, medical employees can claim a locker with their employee card for day use. The administrator can control both wired and battery locks via the Keynus Portal and manage for optimal locker use.
